

The patented SandSweeper system is an innovative alternative to conventional separator cleaning. This patented system aids in the prevention of production loss and downtime associated with conventional de-sanding by removing sand and other solids from a tank or vessel without disrupting production.

## About SandSweeper

- ✓ Post-fabrication installed sand-jetting Manifold
- ✓ Designed for on-line cleaning or reduced downtime applications
- ✓ Automated jet sequencing utilizing programmable logic controller
- ✓ Removes 90% of solids from a vessel without requiring vessel entry

## Benefits

- ✓ Safety - no confined space entry
- ✓ Downtime - reduced or eliminated
- ✓ Predictive maintenance - cleaning interval determined and scheduled before Shut-In is required
- ✓ Reduction in long-term vessel cleaning costs

## SandSweeper Cost Comparison
